GEWA® Quality

We, the GEWA - Bruno Gelle GmbH, are producing practical rubber and plastic articles for the German and international market for more than 40 years. Here in the south of Germany high quality products for the agricultural sector and professional equestrian are manufactured on modern machines as well as our innovative and functional advertising articles.

Our products are highly durable - we are only using high quality plastic materials with a long life endurance, in order that you and your clients can enjoy it for a long time. For many products you can add your individual logo print to make a lasting impression, it could not be better!

Convince yourself about our quality „Made in Germany“!

Flexibility is our strength and your satisfaction our primary objective.

We are looking forward to good cooperation.

Your GEWA® - Team

Colour of article

Article is available in assorted standard colours and/or can be produced in your desired colour (depending on order quantity)

Food-safe and dishwasher-proof

Article is made of food safe plastic material

Our cost-effective packaging solution!

Our skin packages are an ideal helper for upgrading your ordered products. Thanks to this method you can represent your product promotionally effective.

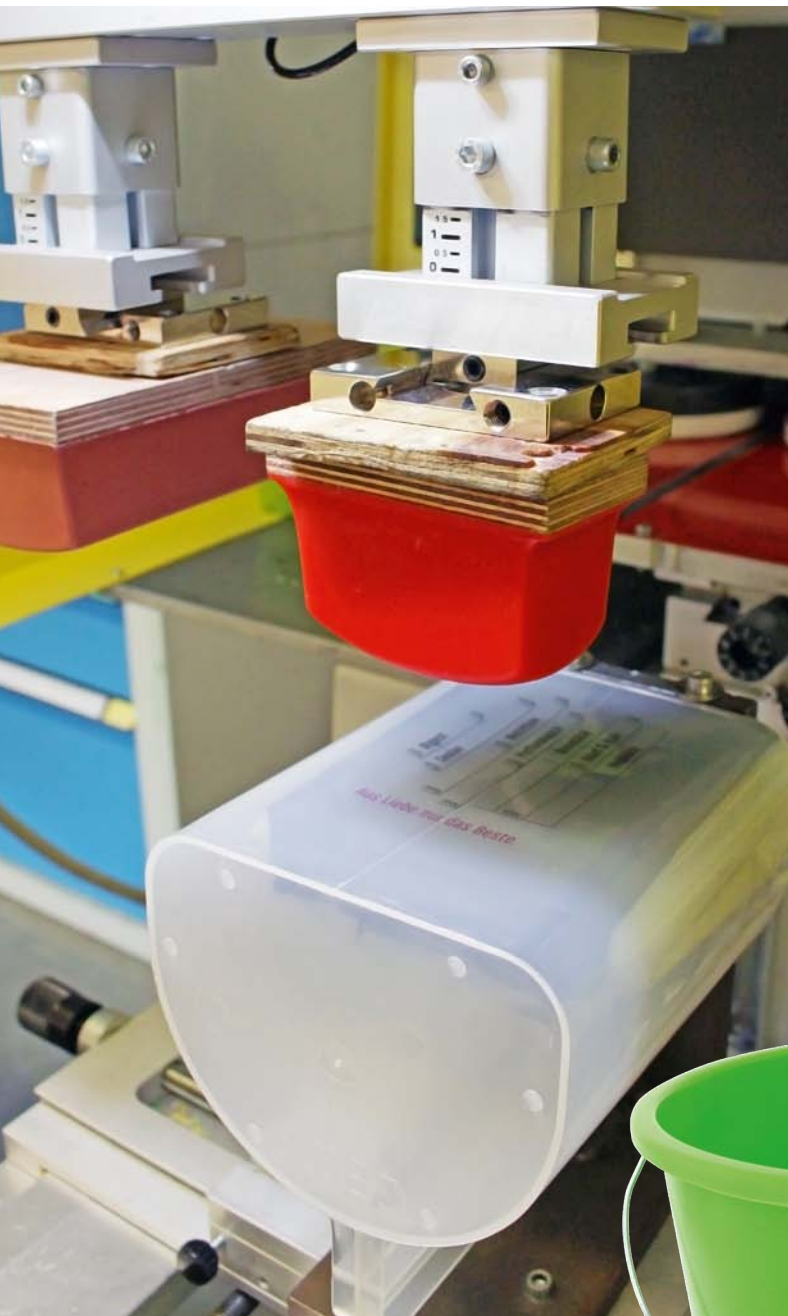

You have the opportunity to order your products directly ex works with skin package and to increase in this way their promotional effect.

Because of its low material use skin packaging is a very favourable possibility to protect your product against robbery, damage, dust and humidity. Therefore your client always will have a new product. This package is also very environmentally friendly, because a large part of package can be disposed as used paper. There will be a short delivery time, because goods can be skin packaged within a few days.

Your advantages in a summary:

- optical upgrading
- cost-effective
- secure
- environmentally friendly
- short production time

High quality promotional items will always be reminded!

Boring giveaways like pens aren't up-to-date any more. But our useful promotional gifts will impress your clients for a long time.

Many of the items in this catalogue can be produced in your desired colour and printed with your individual advertising message.

As a German producer we guarantee best quality to favorable prices. Thanks to our long-standing practice we are able to help you to find a suitable product with promotionally effective print.

Send us your logo and we'll do the rest.

Don't hesitate to buy best quality – it's your good name that will be seen on it!

Your advantages:

- high quality products directly from the manufacturer
- useful and long-lasting advertising
- design service
- short production times

On modern screen and tampon printing machines we create your ideal promotional medium with high efficiency.

What we need from you:

Vectorized file (.eps or .pdf)

If you don't have any vectorized file we can create it for you. The costs will be calculated according to effort.

Calves

Feeding buckets | Teats | Valves | Suction systems | Bottles | Drencher | Calf blankets | Buckets | Troughs | Drinking bowls

Feeding bucket, 8 Litre

Developed for the daily use our feeding bucket is made of stable and food-safe plastic material. Thanks to its strengthened suspension holes it can be hung up at the front or the rear side. The bevelled bottom minimizes milk remains. The engraved scale helps you dosing the filling capacity. Cleaning is very simple because of a slot on the bottom side, which helps to make wash water flow off easily.

- **complete with red teat, valve and plastic holder**
- **lid and metal holder can be ordered optionally**

Premium feeding bucket, 8 litres

The Premium feeding bucket is convincing with its extremely stable plastic material and a higher wall thickness. Even at intensive use a long lifetime can be guaranteed. The bevelled bottom minimizes milk remains and the heightened bottom rim facilitates pouring out. The engraved scale helps you dosing the filling capacity. Easy cleaning because of no corners inside and easy dismantling of the screw-on-valve.

- complete with red teat, valve and plastic holder
- lid and metal holder can be ordered optionally

Insulating jacket for calf feeding buckets

Made from neoprene with 2,5 mm thickness the insulating jacket protects warm milk from fast cooling. So it prevents diseases like colds or diarrhea. A large Velcro at the front side makes mounting easy and gives a perfect fit. The sturdy plastic material at the bottom protects the insulating jacket from dirt and damage.

- **suitable for Art. No. 1000, 1300, 1400, 1500**

GEWA Super Clean Valve

You will like our newly developed plastic valve because of its quick mounting and easy cleaning. For quick cleaning you only have to loosen the front nut (A) to remove the teat and the non-return-stick (B). Now you only have to remove the suction piece (D) in the bucket for easy cleaning of the valve. Our new valve fits to all GEWA teats. Its non-return-stick prevents flowing back of milk into the bucket. It cannot be overtwisted and it seals optimally thanks to the supplied rubber gasket. (C) The extended suction piece enables to diminish rest liquid in bucket.

- Teat can be ordered optionally.

Installation information for teats

Please ensure when installing the cross cut teats that the cuts always form a “+” and not an “x”.

Should they be installed in the wrong way, there will be less flow volume and the calves will suck and chew more. This will lead to longer feeding times and to an increased wear of material.

Right

Wrong

Calf teat conical

This conical rubber calf teat was developed especially for the use with calf feeding buckets. The teats have a cross cut which opens as soon as the calf begins to suck or to chew. For automatic calf feeders a round hole can be punched into the teat. Conical teats have a reduced milk flow, thus the calves drink slower and inhale less air.

Art. No.	Article description					
3020	Calf teat conical red, cross cut	10 cm	2.7 cm	2.4 cm	26 g	100
3021	Calf teat conical red, round hole	10 cm	2.7 cm	2.4 cm	26 g	100
3100	Calf teat conical white, cross cut	10 cm	2.7 cm	2.4 cm	28 g	100
3109	Calf teat conical white, round hole	10 cm	2.7 cm	2.4 cm	28 g	100

Calf teat cylindrical

This high quality teat is used as well with calf feeding buckets as at automatic calf feeders. It is available in lengths of 10 cm or 12 cm. The teats have a cross cut which opens as soon as the calf begins to suck or to chew. For automatic calf feeders a round hole can be punched into the teat.

Art. No.	Article description				
3000	Calf teat cyl. 10 cm red, cross cut	10 cm	2.8 cm	32 g	100
3001	Calf teat cyl. 10 cm red, round hole	10 cm	2.8 cm	32 g	100
3101	Calf teat cyl. 10 cm white, cross cut	10 cm	2.8 cm	36 g	100
3102	Calf teat cyl. 10 cm white, round hole	10 cm	2.8 cm	36 g	100
3010	Calf teat cyl. 12 cm red, cross cut	12 cm	2.8 cm	42 g	100
3011	Calf teat cyl. 12 cm red, round hole	12 cm	2.8 cm	42 g	100
3110	Calf teat cyl. 12 cm white, cross cut	12 cm	2.8 cm	42 g	100
3111	Calf teat cyl. 12 cm white, round hole	12 cm	2.8 cm	42 g	100

Special calf teat

This cylindrical calf teat is made of extremely viscous rubber with very long life-time. Therefore they are used especially in feeding stations. The teats can be punched either with a cross hole for feeding buckets or with a round hole for automatic calf feeders.

Art. No.	Article description				
3120	Calf teat black, cross cut	10 cm	2.8 cm	32 g	100
3121	Calf teat black, round hole	10 cm	2.8 cm	32 g	100
3130	Calf teat green, cross cut	10 cm	2.8 cm	32 g	100
3131	Calf teat green, round hole	10 cm	2.8 cm	32 g	100

Calf teat black

Calf teat green

3120-3121

3130-3131

Smooth calf teats

This cylindrical calf teat is appropriate especially for newborn calves. They like very much the very soft rubber. We also recommend it for the administration of colostrum or medicines to sick animals.

Art. No.	Article description				
3170	Calf teat latex	10 cm	2.8 cm	26 g	100
3172	Calf teat natural caoutchouc	10 cm	2.8 cm	32 g	100

Calf teat latex

Calf teat natural caoutchouc

3170

3172

Latex bottle teat

Our food proof bottle teat can be put on customary bottles with opening diameter of about 25 mm. Because of its strengthened opening the teat holds very tight on the bottle. Calves like very much its soft material.

Art. No.	Article description					
3175	Latex bottle teat	13,5 cm	3,3 cm	2 cm	26 g	100

3175

Rubber teat for automatic feeding

Made of very durable rubber this teat has a long lifetime in spite of permanent use. It has a round hole for higher milk flow rate.

Art. No.	Article description					
3050	Rubber teat for automatic feeding	9 cm	3.5 cm	2.7 cm	36 g	100

3050

Teat "Leimer"

Our teat "Leimer" is a reliable tool for feeding calves since many years. You put the teat into a bucket or tub filled with water or milk. So calves can also drink from open vessels.

Art. No.	Article description			
3036	Teat "Leimer"	7 cm	6.5 cm	28 g

Teat for aluminium valve

This red teat made from durable rubber fits perfectly into our aluminium valves. It has a round hole for high flow rate.

Art. No.	Article description		 bottom	 top	
3040	Teat for aluminium valve	8,5 cm	3.3 cm	2.2 cm	34 g

Aluminium valve

This sinking valve made from high quality aluminium is ideal for feeding of calves from open vessels. It is very easy to clean because of its simple teat-fixation and has a long lifetime.

Art. No.	Article description			
2020	Aluminium valve	2 cm	7.5 cm	84 g
2021	Aluminium valve with teat	-	2.8 cm	118 g

Tube feeding system - fixed installation

This system was developed for the quick and simple fixed installation in stables. The teat holder will be fixed with three screws at the wall. The stainless steel tube is inserted through wall and connected at the rear with the hose. For feeding the hose has to be inserted to a storage vessel. An optional non-return valve inhibits back-flow of liquid from the hose.

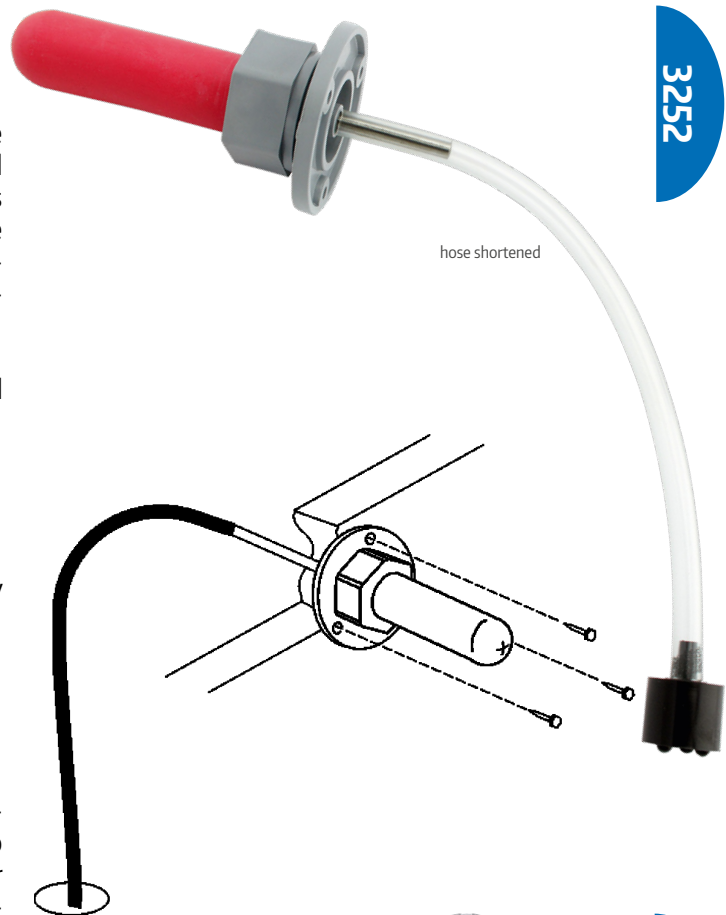

- Incl. teat, teat holder, 150 cm hose
- A non-return-valve (Art. No. 3251) can be ordered optionally

Teat holder

The teat will fit optimally because of its high quality plastic form. Stainless steel tube has a high lifetime.

Non-return valve small

The non-return valve made of very stable plastic material prevents liquids from flowing back from hoses. So colics will be prevented, because calves will suck less air into their stomachs. Three elevations at the bottom prevent adhering of the valve at the bottom of the vessel.

3252

3250

3251

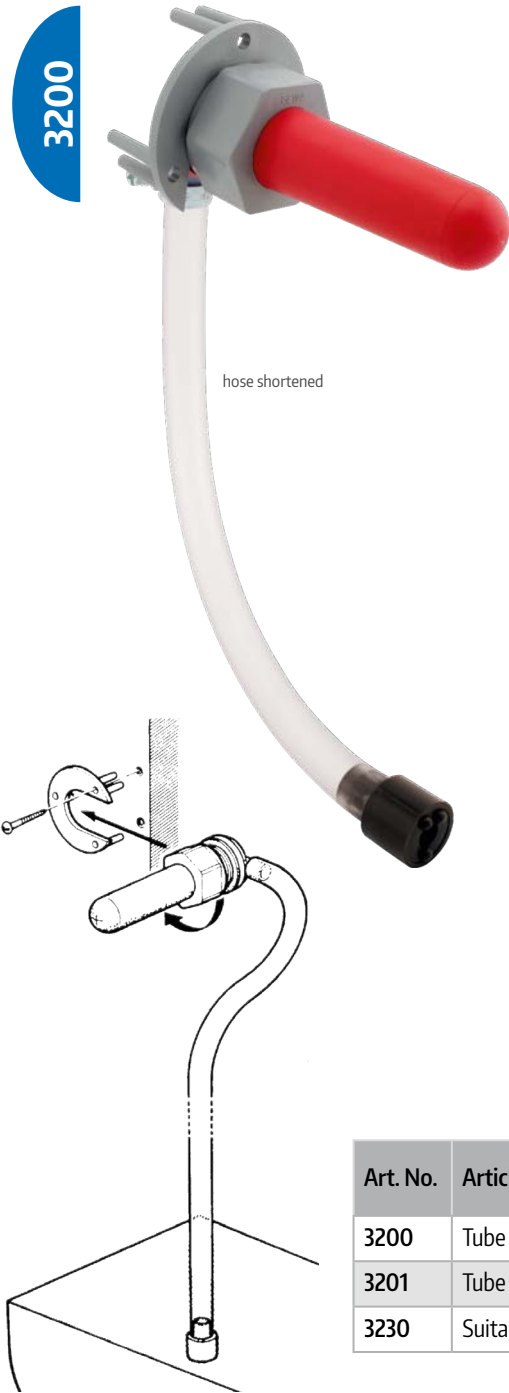

Non-return valve small

Non-return valve small bottom

Art. No.	Article description					
3252	Tube feeding system - fixed installation	150 cm		6 cm	150 g	
3250	Suitable teat holder	8.5 cm	7 cm	-	45 g	3000
3251	Suitable non-return valve small	3.5 cm	2.3 cm	-	8.4 g	

Tube feeding system - changeable

This tube feeding system has been developed for simple mounting and dismounting. The u-formed wall mount holder can be fixed with three screws at the wall (with the pins as spacers). The teat valve can be put on and removed very simply. After having fixed the hose at the teat valve the liquid from a drinking trough can flow through it. The non-return valve inhibits backflow of liquid.

- Incl. wall mount, teat valve, teat, large non-return valve (Art. No. 3230) and hose

Non-return valve large

The non-return valve made of very stable plastic material prevent liquids from flowing back from hoses. So colics will be prevented, because calves will suck less air into their stomachs. Three elevations at the bottom prevent adhering of the valve at the bottom of the vessel

Art. No.	Article description				
3200	Tube feeding system, changeable, 120 cm hose	120 cm		12 cm	255 g
3201	Tube feeding system, changeable, 200 cm hose	200 cm		12 cm	350 g
3230	Suitable non-return valve large	4 cm	2.3 cm	-	8,5 g

The teat valve can simply be stuck on the wall mount holder.

Wall mount holder for tube feeding - changeable

Being very stable it's appropriate for quick mounting and dismounting of teat valve (Art. No. 2000). Wall mount holder has to be fixed with three screws at the wall.

- Suitable for tube feeding - changeable Art. No. 3200, 3201

Art. No.	Article description				
3220	Wall mount holder for tube feeding - changeable	6.5 cm	7 cm	3 cm	11 g

GEWA Valve for tube feeding changeable

Our high-quality plastic valve fits to all GEWA teats. It cannot be over-twisted and it prevents a backflow of the milk. Thanks to its extended suction piece only few rest liquid remains in the bucket. Thanks to the integrated non-return valve milk only can be drawn until teat aperture. Hose connection should point downwards in calf bar unit system.

• Suitable for tube feeding - changeable Art. No. 3200, 3201

Art. No.	Article description					
2000	GEWA Valve	5.5 cm	4.5 cm	4.5 cm	42 g	5000

2000

Grain-/pellet bottle 2.5 l

This bottle is ideal for feeding of grain or feed pellets. Thanks to its large filling hole you can fill and clean it very easily. A suitable grain or pellet teat lets contents only out when the calf is chewing on it. An integrated handle makes mounting and demounting in optional metal holder convenient. The teat holder is also compatible to our GEWA-calf teats; so you can also fill milk into the bottle. So it's very versatile.

- Incl. grain/pellet teat (Art. no. 3041)

Metal holder for grain/pellet bottle

Developed for fast installation of grain/pellet bottles. The bottle can be securely fixed with it and protected against falling down. For easy mounting at the wall.

- Suitable for grain/pellet bottle Art. No. 4156

Art. No.	Article description					
4156	Grain-/pellet bottle incl. grain/pellet teat	2.5 l	37 cm	10 cm	16 cm	230 g
4151	Grain-/pellet bottle incl. grain/pellet teat and metal holder	2.5 l	37 cm	10 cm	16 cm	450 g
4159	Metal holder for grain/pellet bottle		26.5 cm	13 cm	14.5 cm	220 g

Grain/pellet teat

This teat is very durable because of its hard-wearing material. Two rubber lips in the teat let contents only out when the calf will be chewing on it.

- Suitable for grain/pellet bottle Art. No. 4156

Art. No.	Article description			
3041	Grain/pellet teat	7 cm	3 cm	18 g

Milk bottles for calves

These functional milk bottles made of soft plastic material are suitable for feeding milk or dosing medicine because its scale can easily be read. The bottles are compatible with all GEWA-teats and therefore versatile.

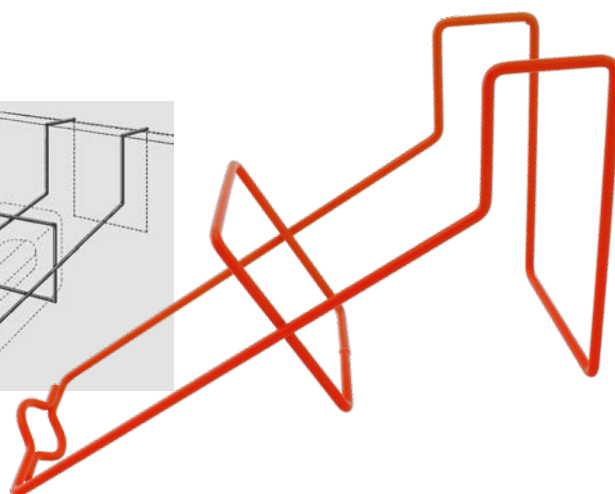

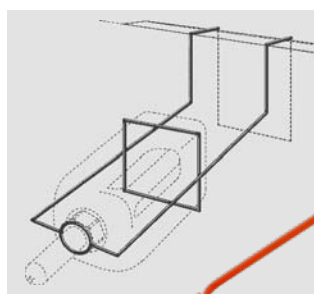

• Incl. teat Art. No. 3000

Art. No.	Article description								
4101	Milk bottle for calves, 500 ml	0.5 l	6 cm	30.5 cm			80 g	750	✓
4110	Milk bottle for calves, 1 litre	1 l	8 cm	32.5 cm			115 g	500	✓
4130	Milk bottle for calves, 2 litres	2 l		34.5 cm	10 cm	10 cm	190 g	350	✓

Metal holder for milk bottles

This metal holder for 1 and 2 l milk bottles is easy and flexible to install. It can be easily hung to the stable wall and secures the plugged in milk bottles.

Art. No.	Article description				
4150	Metal holder for milk bottles	17 cm	13 cm	38 cm	305 g

Plug for milk bottle

This plug makes our milk bottle completely tight, so e.g. freezing of colostrum is possible without any problems. Suitable to all GEWA milk bottles

Art. No.	Article description			
3168	Plug for milk bottle	1 cm	3.5 cm	418 g

Shoulder strap optionally available

Milk bottle calves Deluxe

These new bottles made from plastic material are ideal for feeding milk and/or giving medicine. Well readable scale and large opening help with exact dosing. While our 2- and 4 l bottles have a practical handle, a shoulder strap can be attached to the 4-l-bottle additionally. Because of their large opening they are easy to clean. They have a self-regulating air hole, which prevents a vacuum. The bottles are suitable to all GEWA teats and therefore versatile.

• incl. teat (Art. No. 3000)

Art. No.	Article description								
4180	Milk bottle calves Deluxe, 1 litre	1 l	9 cm	36 cm			170 g		✓
4184	Milk bottle calves Deluxe, 2 litres	2 l		43 cm	16 cm	11 cm	440 g		✓
4188	Milk bottle calves Deluxe, 4 litres	4 l		51.5 cm	18 cm	13.5 cm	535 g		✓
8007	Shoulder strap for milk bottle calves Deluxe, 4 litres						45 g		

Premium milk bottle, 3 l

Our Premium milk bottle for calves offers an outstanding functionality. It has a big opening for filling and cleaning. A self-regulating air hole prevents a vacuum. The bottle is compatible with all GEWA-teats. Because of its integrated scale it is also appropriate for dosing medicine.

• Incl. teat (Art. No. 3000)

GEWA Easy Drencher

Very good for quick and easy drenching. You can fill this bottle, made of soft plastic conveniently thanks to its poured-in scale. A mouth-piece is included with delivery. It is made of very stable plastic material so that the calf can't squeeze it during being drenched. The opening of the mouthpiece is rounded to prevent injuries.

Art. No.	Article description

Drencher

This drencher enables easy and secure drenching of sick and weak calves. Its capacity is 3 litres and it has an 80 cm long flexible hose which is connected with a 50 cm long gorge tube. At the end of the gorge tube there is a rounded plastic top for secure passing into the gullet. A large filling opening, a poured-in scale and a self-regulating air hole make handling easier. Dimensions without hose and tube.

! Before using the drencher please check the end cap and all plug connections for tightness.

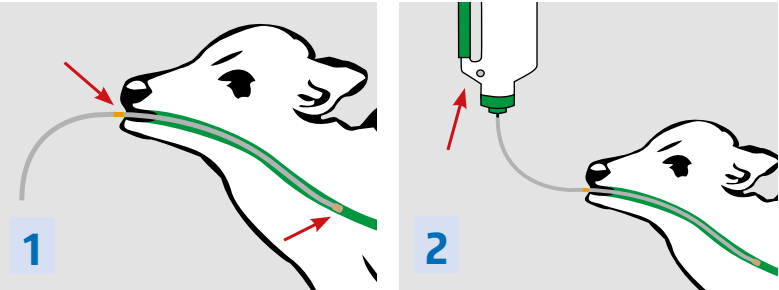

Art. No.	Article description						
4147	Drencher, 3 litres - inclusive hose	3 l	43.5 cm	11 cm	11 cm	530 g	✓
4146	Drencher, 3 litres - without hose	3 l	43.5 cm	11 cm	11 cm	400 g	✓

Professional Drencher

Recommended by veterinarians our Professional Drencher enables easy and secure drenching of sick and weak calves. It has a special hose with heavy brass head for easy passing into the gullet. A marking at 45 cm indicates maximum passing of the hose. An extra-large filling-opening, a poured-in scale and a self-regulating air hole make handling easier.

- Length of hose 100 cm
- Dimensions without hose.

! Before using the Professional drencher please check the end cap and all plug connections for tightness.

Guide for drenching with the Profi-Drencher

- Insert the tube with the brass head first (fig. 1). **Warning:** Make sure that the tube is inserted into oesophagus and not into trachea!
- Attach full drencher-bottle to tube.
- Raise drencher-bottle with finger on vent (fig. 2).
- Remove finger from vent to administer fluid.
- Liquid flows out of the bottle into the stomach.
- To end drenching, carefully remove the tube from the oesophagus.

Cow tail holder "Allgäuer"

Optimal for stanchion tied stables. It protects the cow from soiling. It is also very useful during milking, because the milker won't be disturbed by the cow tail. The upper rubber (A) is fixed securely at the ceiling of the cow stand and cannot shift. By means of an upper holder (B) made of metal the upper rubber is connected with the elastic string (C). The string functions as overload protector and loosens the holder in case of excessive traction. By means of a Nylon string the cow tail can be hanged higher (for example when you're milking). At the lower part you find a quick lock for the cow tail. It consists of a metal pin (E) and a lower rubber (F). This holder is also available completely with rubber cord.

Cow tail holder "hairless"

Optimal for stanchion tied stables. It fits very well to cow tails without any hair. The upper rubber (A) is fixed securely at the ceiling of the cow stand and cannot shift. By means of an upper holder (B) made of metal the upper rubber is connected with an elastic string (C). The string functions as overload protector and loosens the holder in case of excessive traction. At its end you find a closure tube (G), in which you can fix securely the cow tail. The special form of the tube prevents disconnection of blood supply.

Triangular trough, 26 litres

Its plastic material withstands very high stresses and its well thought out shape with an extra strengthened front increases stability of the triangular trough enormously. Thanks to its size the cow has enough space to sort its feed and to eat slowly. Because of its rounded shape there will be no food remains in it. Delivered without hooks. You can directly screw it on the wall. Upon request the trough can be equipped with a hole and a drain screw for easy cleaning.

• **Optionally available: Hooks Art. No. 1192 or Art. No. 1193**

Rectangular lamb bucket, 10 litres

It is made from very stable and food-safe plastic material and appropriate for installation above fences. Thanks to the conical suspension device it fits on boards with different thickness. The two milk compartments are very easy to clean and can be equipped with different numbers of sucking points..

- **Complete with 50 mm lamb teat and valve**
- **also available in black.**
- **lid (Art. No. 1180) optionally available**

Rectangular lamb bucket economical, 10 litres

Made from very stable and food-safe plastic material it is appropriate for installation above fences. Thanks to its conical suspension device it fits on boards of different thickness. The two milk compartments are easy to clean and equipped with three teats incl. special valve.

- **Complete with 70 mm lamb teat and valve**
- **also available in black.**
- **lid (Art. No. 1180) optionally available**

Lid for rectangular lamb bucket

This lid is characterized by its high accuracy of fit. A practical tab enables an easy removal of the plugged lid.

Premium lamb bucket, 10 l

Our premium lamb bucket is made of food-safe plastic material, it is easy to clean and extremely hard-wearing. It has a strengthened and enlarged suspension device. Thus it is much more durable and more versatile. The two milk compartments have a bevelled bottom and therefore there are less liquid remains.

• Complete with 50 mm lamb teat and valve.

Art. No.	Article description

Lamb bar

Equipped with two sucking points it is ideal for the use on cold days. As lambs can get diarrhea when drinking cold milk, this lamb bar has two separate filling bins. Therefore the milk container can be put into a warm water bath and so it is protected from quick cooling. Its smooth and stable plastic material is easy to clean.

• Incl. teat, valves and hoses

Art. No.	Article description			
1135	Lamb bar, 2 suction points	43.5 cm	38cm	2700 g

Bucket holders

Our very stable plastic and metal holders fit to all GEWA calf feeders. Simple and secure mounting as well as their long lifetime will convince you

Art. No.	Article description				
2008	Special spanner	16 cm	6.5 cm	1 cm	76 g

GEWA Valve

Our high-quality plastic valve fits to all GEWA teats. It cannot be overtightened and it prevents a backflow of the milk. Thanks to its extended suction piece only few rest liquid remains in the bucket

2000

2010

Art. No.	Article description					
2000	GEWA Valve	5.5 cm	4.5 cm	4.5 cm	42 g	5000
2010	Rubber gasket	-	-	-	2 g	-

GEWA Super Clean Valve

You will like our newly developed plastic valve because of its quick mounting and easy cleaning. For quick cleaning you only have to loosen the front nut (A) to remove the teat and the non-return-stick (B). Now you only have to remove the suction piece (D) in the bucket for easy cleaning of the valve. Our new valve fits to all GEWA teats. Its non-return-stick prevents flowing back of milk into the bucket. It cannot be overt-wisted and it seals optimally thanks to the supplied rubber gasket. (C) The extended suction piece enables to diminish rest liquid in bucket.

• Teat can be ordered optionally.

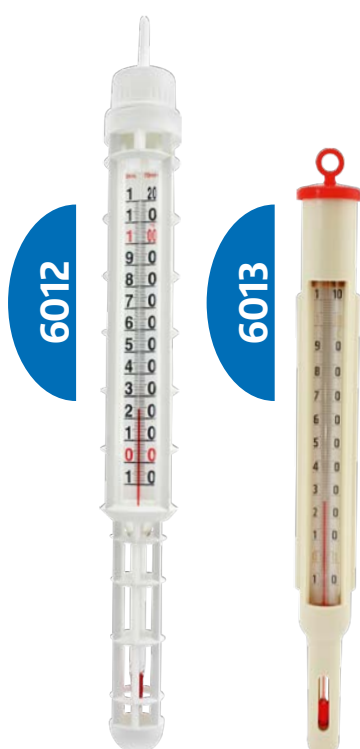

Art. No.	Article description			
1999	GEWA Super Clean Valve	7 cm	5.5 cm	50 g
2010	Rubber gasket			2 g

GEWA Lamb valve

These inexpensive valves are used as non-return-valves in lamb teats. They prevent effectively a backflow of milk from the teat. You can buy them as high quality plastic version or as long life aluminum version.

Art. No.	Article description			
2040	Lamb valve plastic	2,5 cm	1 cm	1 g
2045	Lamb valve aluminium	2,5 cm	1 cm	2 g

Milk thermometer

The free of mercury milk thermometers are ideal for the exact determination of the calf milk's temperature. Of course they are boil-proof and have a suspension eye.

Art. No.	Article description	Temperature range displayed				
6012	Milk thermometer, 34 cm	-10 °C to 120 °C	34 cm	3.5 cm	3 cm	50 g
6013	Milk thermometer, 28 cm	-10 °C to 110 °C	28 cm	3 cm	2 cm	55 g

GEWA Lamb teats

The lamb teats made from rubber have been developed especially for the use with lamb buckets. The teats have a cross cut which opens as soon as the lamb begins to suck or to chew. The teats have a diminished milk flow, so the lambs drink slower and inhale less air. Teats are available in 50 mm and in 70 mm.

- Lamb teats, 50 mm suitable for valve Art. No. 2000
- Lamb teats, 70 mm suitable for valve Art. No. 2040, 2045

7660

Easy manure collector

Thanks to its well-thought-out design mucking out is very comfortable with the easy manure collector. The new developed hand piece makes carrying the full manure collector much easier and it relieves your wrist. The plastic rake is pleasantly light to carry and can be easily clipped on the collector for economic storage. Your ideal companion in stable and at tournaments. Can be delivered mounted and unmounted.

7659

ECO manure collector

At first sight it looks like most of the common manure collectors. Only when using it you can see its many advantages. It is much lighter than other manure collectors but also very stable and long-lasting. Because of the extension of the handle the center of gravity moves backwards and so carrying is facilitated. The plastic rake is very light and can be easily clipped on the manure collector for economic storage. Can be delivered mounted or unmounted.

7632

Dung fork PRO, small

Dung fork PRO was designed for long-time application in stables. It consists of extremely stable material and stands up to heavy strains. It's even ready for use at very cold temperatures in winter time. Thanks to its special shape the dung can easily be separated from litter. Lateral elevations prevent the horse droppings from falling down.

7642

Dung fork PRO, large

The special material of the dung fork is dimensionally stable and ready for use at very cold temperatures. Because of its deepened special shape a lot of dung can be separated quickly from litter.

Dung fork PRO light

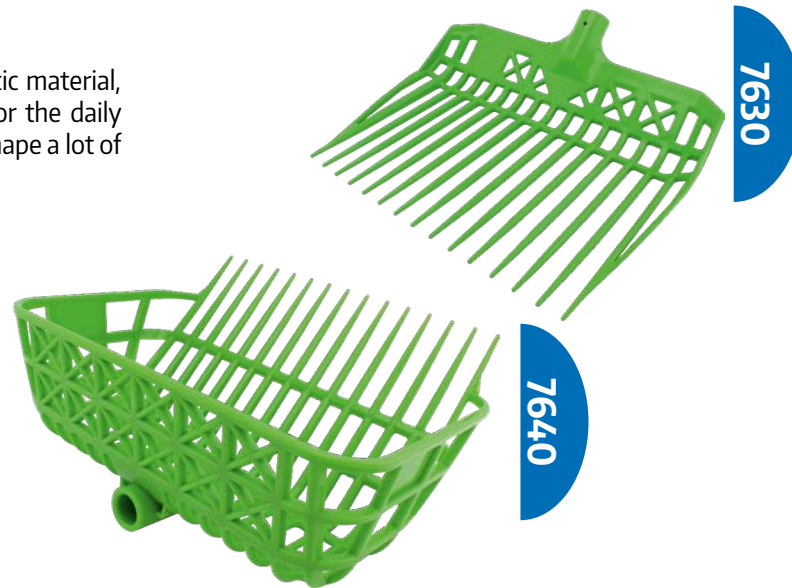

Our new dung fork PRO light combines all advantages of our PRO series. Besides extremely stable material, which can be used at very cold temperatures, the sides of the dung fork were heightened for targeted mucking out. Thanks to a light weight also appropriate for children.

7635

Dung fork special

Made of hard-wearing and shock resistant plastic material, our green dung fork was developed specially for the daily use in stables. Because of its deepened special shape a lot of dung can be separated quickly from litter.

Dung fork ECO

Our dung fork ECO is characterized especially by an excellent price-performance-ratio. The material promises high robustness at low price. Suitable as well for stable use as for gardening.

Stable thermometer

Free of mercury this thermometer indicates reliably the room temperature from -30°C up to $+50^{\circ}\text{C}$. There are printed recommendations on it for correct room temperature according to the animal species. Thanks to an eyelet the thermometer can be fixed easily at the wall.

6002

Outdoor thermometer

Made of plastic material it is for the use in weatherprotected outdoor areas. Free of mercury it indicates temperatures from -40°C up to $+50^{\circ}\text{C}$. It can be fixed with an eyelet at the wall.

6001

Minimum-maximum-thermometer

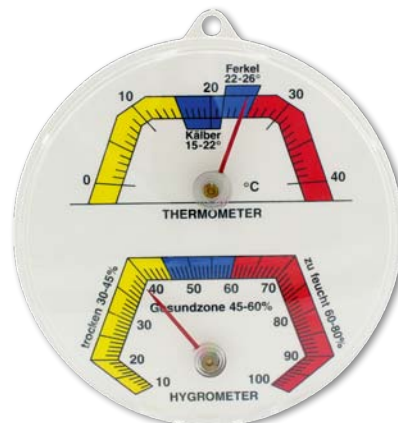

The minimum-maximum-thermometer is used to make records of the minimum and maximum temperatures for a longer period. Simultaneously it indicates the current temperature. With a push button you can reset the values. The thermometer is weather proof and filled with a not dangerous liquid. Completely made in Germany it indicates temperatures from -40°C up to $+50^{\circ}\text{C}$.

6006

Thermo-hygrometer

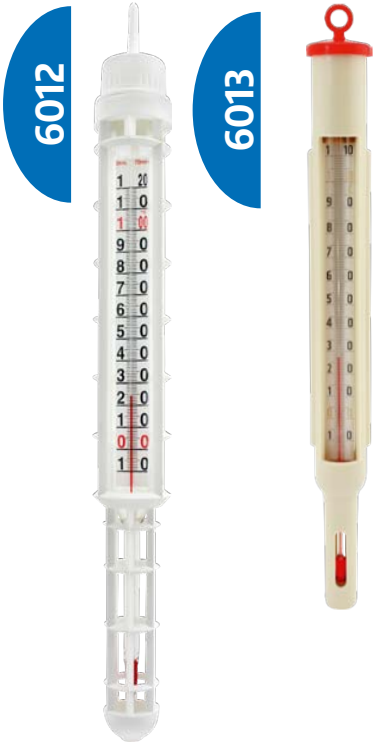

It indicates reliably temperature and humidity in rooms. The control of targeted heating and ventilation creates a comfortable climate for animal husbandry. Optimal climate values are printed on it. The temperature is indicated from 0°C up to 40°C and humidity is indicated from 10 up to 100 %

6006

Milking churns | Milk churns | Milk test | Accessories | Cleaning | Sprayers

3525

Milking churn, 20 l

It is ideal for milking unusable milk, for example from sick cows. As hoses of milking churn can be connected directly at the lid of the milking churn there is a quick and easy handling. The lactic acid resistant plastic material is very easy to clean and the stable stainless steel handle enables a secure transport.

Art. No.	Article description						
3525	Milking churn, 20 litres	20 l	48.5 cm	28 cm	2300 g	25	✓

6150

Tank cap

This cap made from stable plastic material is applied as replacement product if the original cap of milking tank should have been lost or destroyed. This cap is suitable to milking tanks with an opening of 18,1 cm diameter.

Art. No.	Article description					
6150	Tank cap	7 cm	20 cm	345 g		✓

3540

GEWA quarter milker

With our quarter milker milk can be milked separately from an udder quarter, if it should be contaminated or if it should show an increased cell content. The very stable plastic kettle has a large opening for easy cleaning and has a pressure limit of 0.4 bar up to max. 0.6 bar.

Art. No.	Article description						
3540	GEWA quarter milker	12 l	30 cm	25 cm	1630 g	72	✓

Instructions for use

1. Put O-ring on opening of kettle and grease it. Therefore lid is easy to open or close.
2. Press with ball of the thumb onto lid. Simultaneously turn to right, until it will lock in.
3. Connect hose with adapter with dipper of milking machine.
4. Connect hose without adapter with milk collection piece and fix above valve cage.
5. After use clean by hand with detergent.
6. After cleaning open milker for drying.

GEWA milk churns

Our milk churns are characterized by food-safe, cadmium-free and lactic acid-resistant plastic material. The extremely stable plastic milk churns have a practical stainless steel handle for easier transport. Delivery includes lid for protection against insects and other contaminations.

Information about GEWA-Fit

GEWA-Fit is a product series for easy treatment of serious hoof diseases (for example extensive dermis defects, sole ulcerations etc.) of cows and cattle. For certain indications GEWA-Fit supports the therapy of the veterinarian and shortens the treatment duration substantially. Also high-grade lame cows walk essentially better after a short time after treatment. GEWA-Fit-glue is toxically harmless and skin-friendly. It is easy to handle at a temperature from +15 °C up to +20 °C. It hardens already after 5 – 7 minutes.

GEWA-Fit is a German product that offers high quality for a good price-performance.

Summer mixture 1:1 (liquid : powder)
Winter mixture 1:1.5 (liquid : powder)

GEWA-Fit powder

GEWA-Fit powder is a component, which is, together with GEWA-Fit liquid, necessary for the production of GEWA-Fit hoof glue.

Art. No.	Article description				
5508	GEWA-Fit powder, 250 g	0.25 kg	7	11.5 cm	285 g
5506	GEWA-Fit powder, 500 g	0.5 kg	11	15 cm	580 g
5501	GEWA-Fit powder, 1 kg	1 kg	16.5	13 cm	1100 g

GEWA-Fit liquid

GEWA-Fit liquid is a component, which is, together with GEWA-Fit powder, necessary for production of GEWA-Fit hoof glue.

Art. No.	Article description				
5509	GEWA-Fit liquid, 250 ml	0.25 l	7.5	9.5 cm	315 g
5507	GEWA-Fit liquid, 500 ml	0.5 l	8	14 cm	575 g
5502	GEWA-Fit liquid, 1 l	1 l	10	17 cm	1100 g

5503

Wooden spatulas

They are ideal for mixing the two GEWA-Fit adhesive components and for applying this mixture onto the hoof later. 10 pcs / pack

Art. No.	Article description	 g
5503	Wooden spatulas 10 pcs / pack	2 g

5504

This 300 ml mixing cup is ideal for mixing GEWA-Fit glue in it. It is easy to clean and it is reusable.

Art. No.	Article description				 g
5504	Mixing cup 300 ml	0.3 l	8.5 cm	8 cm	23 g

55042

55041

Measuring spoon

It is ideal for exact dosing GEWA-Fit powder and liquid.

Art. No.	Article description	 g
55041	Measuring spoon, red	4 g
55042	Measuring spoon, blue	4 g

Wooden blocks

Our wooden blocks are the first choice for the most standard applications. In conjunction with GEWA-Fit glue the blocks serve as abrasion protection on floors with high abrasion (e.g. on concrete) and as height compensation for treated hoofs with low foot ankle. Besides straight blocks we also have bevelled ones in case of different foot ankles. All blocks are made from beech wood and have grooves of 1 mm or 3 mm for an optimal support.

Art. No.	Article description	Height	Width	Length	Weight (g)	Quantity
5010	Wooden block Standard, 3 mm-groove	2.2 cm	11 cm	5.5 cm	70 g	150
5012	Wooden block Standard bevelled, 3 mm-groove	2.2 cm	11 cm	5.5 cm	70 g	180

5016	Wooden block Standard bevelled, 1 mm-groove	2.2 cm	11 cm	5.5 cm	70 g	180
5017	Wooden block large, 1 mm-groove	2.5 cm	13 cm	6.5 cm	100 g	125
5018	Wooden block large bevelled, 1 mm-groove	2.5 cm	13 cm	6.5 cm	100 g	125

GEWA Hoof shoe for cattle

This plastic hoof shoe is to be fastened at sick or injured hoofs. It protects against further injuries and keeps ointments and bandages on hoofs for a longer time. Thanks to its large opening it can be fastened easily. Fastening straps ensure a secure fixation. Nubs at the bottom enable a secure stand. The suitable wooden block (Art. No. 5011) should be ordered necessarily with this hoof shoe.

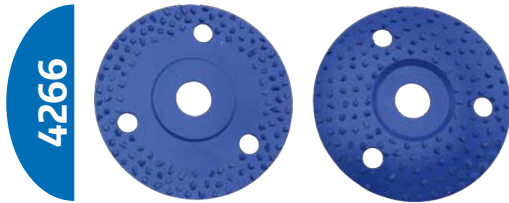

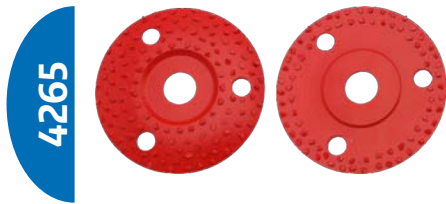

Wooden block for hoof shoe

It goes perfectly with the hoof shoe for cattle (Art. No. 5000). Usable on both sides.

Art. No.	Article description	Height	Width	Length	Weight (g)	Quantity
5000	Hoof shoe for cattle	20 cm	13.5 cm	17 cm	455 g	
5011	Wooden block for hoof shoe				100 g	200

Metal discs, double-sided

Th metal discs made from turned steel are equipped with grain on both sides and therefore versatile. They fit into a customary angle grinder and have a long lifetime at high smoothness.

• **Made in Germany**

Art. No.	Article description			Grain
4265	Metal disc double-sided, red	280 g	11,5 cm	FS 2-3 mm, BS 20 mm
4266	Metal disc double-sided, blue	360 g	12,5 cm	FS 2-3 mm, BS 15 mm

Metal discs

In contrast to metal disc Art. No. 4258 which is made of turned steel, the metal disc Art. No. 4269 was punched. However both discs are of best quality, fit into a customary angle grinder and have a long lifetime at high smoothness.

• **Made in Germany**

Art. No.	Article description			Grain
4258	Metal disc, turned	275 g	11.5 cm	finely laid
4269	Metal disc, punched	275 g	11.5 cm	2-3 mm, widely laid

Hoof disc, metal

Made from turned steel they fit into customary angle grinders and have a long lifetime. Furthermore hoof disc Art. No. 4261 is strengthened with tungsten carbide.

Art. No.	Article description			Grain
4250	Hoof disc, metal	383 g	12.5 cm	finely laid
4259	Hoof disc, metal	275 g	11.5 cm	2-3 mm, widely laid
